POLICY AND PROCEDURES

Trauma, Vicarious Trauma, Burnout and Self-Care

PREAMBLE

Work in community services and at CLA can be stressful and tiring as well as fulfilling and rewarding. The work at CLA can also involve working with people who have experienced trauma and may be experiencing trauma on a continuing basis. Work at CLA can also at times include involvement in situations where workers (paid staff) and volunteers may feel personally threatened. This happens rarely but can happen.

CLA identifies these potential not as a way of deterring people from working in the organisation but as a reality which people should be prepared for.

We encourage prospective workers, including students at CLA to reflect on their personal history of trauma and whether a) this might prevent them applying for a job at CLA or b) whether it is something they consider in their self-care plans. Prospective workers are encouraged to reflect on how they will plan for an appropriate work/life balance, monitor their sleep and self-care plans; if you are successful in being offered a position at CLA we will support you to reflect on these matters.

POLICY

CLA recognises the potential for burnout, vicarious trauma and trauma impacts of this work and will work with its workers to maintain appropriate self-care.

PROCEDURE

- Applicants for work at CLA will receive a copy of this policy and procedure as part of the Application Pack – included in Recruitment Checklist.
- Interview processes will include questions related to potential for exposure to vicarious trauma and trauma.
- This policy will be included in Induction Checklist.
- Supervision will include checking with workers on self-care plans and strategies. This will be written into every supervision agreement. (See Supervision Agreement)
- Workers are encouraged to consult resource material on burnout/vicarious trauma and trauma/self-care and sleep hygiene. (See Related Documents)
- Team Leaders and workers are reminded that if there are concerns about worker safety then safety plans need to be established. (See Section 2.4.12 Outreach Worker Safety Policy)
- It is not an expression of personal failure for workers to experience fatigue, apprehension or distress. It can be a natural reaction to stresses on the job. We encourage workers to be open about these feelings with their supervisor.
- Where workers are experiencing negative impact due to the work, team leaders will engage with them around remedial actions. These may include: self-care plans, safety plans, counselling, critical incident responses, disengagement from certain situations.
